

Our World in the Future

Year 6 - Summer

- The way we have lived for the last 200 years can no longer be sustained. Rapid material growth has caused untold damage to the Earth.
- Humans have dug up raw materials, built over natural habitats, and constantly dumped waste, damaging the planet, on which all life depends.
- Rather than trying to work within the Earth's natural systems, development has gone on with little regard to the Earth's systems.

sustainable	Using resources to meet current needs but ensuring enough resources are left for future generations. Looking after the planet, protecting plants, animals and natural resources.
region	An area or part of a country or the world which has a certain characteristic but not always fixed boundaries.
community spirit	individual or group activities in which members of a community choose to engage for the benefit of that community.
Amenities and public services	Includes a a wide range of services and facilities including: education, health care, fire service, law enforcement, postal service, public library, public transportation, parks and waste.

Different types of houses

Sectors of Industry

Although there are hundreds of different jobs or occupations, they can all be classified into 4 categories:

Primary

Working with or the extraction of natural resources e.g. Farming, mining or forestry

Secondary

Making things either by manufacturing or construction e.g Nissan Car manufacturing

Tertiary

This type of industry provides services. These include commercial services (Shops), Professional (Solicitors), Social (School teacher), entertainment (restaurants), Personal (Hairdressers)

Quaternary

This is a new sector and is linked to ICT and research development (Genetics Researcher)

An example of sustainable housing
